SUMMARY: Results-driven Software Engineer with 2+ years of experience building scalable web and mobile applications using modern technologies including React.js, Next.js, Node.js, MongoDB, and React Native, Expo, Tailwind CSS. Proven ability to develop full-stack solutions, optimize system performance, and manage production deployments across SaaS platforms. Experienced in API integrations, CI/CD pipelines, cloud deployments, and Agile development practices. Passionate about solving real-world problems through clean code, continuous learning, and delivering high-impact software solutions.

WORK EXPERIENCE

Software Engineer, Tecsoa LLC USA

Jul 2025 - Present

- Lead full-stack development and production delivery across multiple SaaS and mobile products serving operational businesses in logistics, home services, and workforce management.
- Own architecture, feature delivery, and system scalability for LMP (Loch Monster Plumbing), a Jobber-integrated platform built with Next.js, Node.js, MongoDB, GraphQL, Tailwind CSS for the web app, and LMP Mobile app using React Native with Expo and EAS for ios and android both.
- Spearheaded development of LineHaul, an enterprise logistics management platform for truck-driver dispatching, route tracking, load management, and admin workflows using Next.js, Node.js, MongoDB.
- Built and maintained HomeKuk, a cross-platform mobile app using React Native + Expo, delivering seamless mobile experiences and scalable backend integrations.
- Managed end-to-end DevOps processes including Vercel deployments, CI/CD pipelines, environment configuration, release management, database migrations, and production monitoring.
- Designed technical architecture, optimized application performance, and established coding standards for maintainable, scalable codebases.
- Collaborated directly with stakeholders, product teams, and engineers to prioritize roadmaps, accelerate delivery cycles, and improve product reliability.
- Mentored junior developers and contributed to code reviews, engineering best practices, and sprint execution.

Associate Software Engineer, Tecsoa LLC USA

Jul 2024 - Jul 2025

- Developed and enhanced business-critical web applications across multiple client products using React, Next.js, Node.js, MongoDB, and modern UI frameworks.
- Expanded LMP with new operational modules, API integrations, and performance improvements using GraphQL and Jobber API.
- Maintained LWL (Life Without Laundry) with route optimization workflows, driver logistics, and customer operations using Google Route Optimization APIs.
- Rebuilt TINT, migrating legacy frontend systems from Material-UI to React-Bootstrap while introducing new marketplace features.
- Built cv2resume, an AI-assisted resume generation platform using Next.js, enabling automated conversion of CVs into US-standard resumes.
- Participated in QA cycles, sprint planning, architecture discussions, and workflow optimization using Notion and Agile methodologies.

Intern Software Engineer , CreativeHub Global

Jan 2024 - Jul 2024

- Contributed to full-stack development across multiple business platforms including Datapal, Toastmasters, Saneck Safety, and Serendib Hotels.
- Built responsive user interfaces with React.js, Next.js, Tailwind CSS, improving usability and accessibility.
- Developed backend services and API integrations using Node.js, Strapi, MongoDB, MySQL.
- Worked in Agile teams with daily standups, sprint planning, testing, and peer code reviews.
- Delivered production-ready features while gaining hands-on experience in enterprise software development lifecycle practices.

EDUCATION

BSc. Special (Hons) in Information Technology

Jun 2021 - Jul 2025

Sri Lanka Institute of Information Technology

- Specialization in Software Engineering (Second Class 3.3 CGPA)

Pearson Diploma in Information Technology and English

Sep 2017 - Sep 2018

ESOFT Metro Campus, Galle

G.C.E. Advanced Level

Aug 2017

Mahinda College, Galle

ADDITIONAL INFORMATION

- **Skills:** Programming Languages (JavaScript, TypeScript, Java), Frontend Frameworks (React.js, Next.js), Backend Frameworks (Express.js, Spring Boot), Package Managers (Node.js), Databases (MongoDB, MySQL), CMS (Strapi), Styling Frameworks (Tailwind CSS, Bootstrap), Mobile Applications (React Native, Expo, EAS)
 - **Languages:** English, Sinhala
 - **Interests:** CI/CD, Machine Learning, Deep Learning, AI, Cyber Security, AWS, Azure
-

PERSONAL PROJECTS

- **Intelligent EcoUrban Monitoring System (IEMS):** Developed an integrated AI-driven smart city monitoring framework combining IoT sensor data, deep learning, satellite imagery, and large language models (LLMs) to address critical urban environmental challenges. Designed specialized modules for air pollution monitoring, noise classification, vehicle CO2 emission estimation, and green space depletion analysis. Built scalable dashboards and analytics tools for real-time environmental insights and decision support with React.js, Spring Boot, Flask, Python, TensorFlow, OpenCV, IoT, Satellite Data, NLP, LLMs
 - **EyeZen & EyeZenMobile:** Developed a complete digital eyecare platform consisting of both web and mobile applications to improve access to vision support tools, eye health resources, and user-friendly healthcare services. Built responsive web experiences and cross-platform mobile functionality to deliver seamless accessibility across devices. Focused on usability, performance, and scalable full-stack architecture with React.js, Node.js, MongoDB, React Native, Expo, Express.js
 - **SkillSprint:** Built a microservices-based education platform with scalable backend services and containerized deployment with React.js, Spring Boot, Docker, Kubernetes, Tailwind CSS
 - **Travely:** Developed a travel management system with bookings for transport, tours, and events with MongoDB, Express.js, React.js, Node.js
 - **AstroNexus:** Built a NASA API explorer for Mars rover images and astronomy data with React.js, Node.js, MongoDB, REST APIs
 - **Kandy Cookery:** Designed a responsive restaurant website with modern UI/UX with React.js, Tailwind CSS
-
